

**Dear author,**

Please be informed that the abstract will only enter the arbitration process if it meets **all of the following conditions**:

- Abstract submitted for **4th Shiraz International Congress on Mobile Health** should be an original work, not previously published, totally or partly and submission is only acceptable through online peer review system.
- Abstract must be in English (Persian abstract is not accepted) and Microsoft Word format (.doc/.docx). The text must be typed using 12-point Times New Roman font, A4 size page's margin should be 3.5 cm. The abstract should be written in a single column and between lines spacing of 1.5, left justification. Each page of the total text must be numbered.
- Article title font is Times New Roman 14pt **Bold**. The first section of abstract should consist of the **title**, **name of authors**(s), academic titles such as PhD, MSc, BSc and so on, **affiliation**(s) and **address** (Tel, and Email) of all authors and **ORCID** of first and corresponding Authors.
- Submissions of text in the form of PDF files are not permitted. Please avoid footnotes. Avoid context and reference figure in the abstract. Formulas must be typed in the text, and images of them are not acceptable.
- In original articles, it is necessary to mention the **type of study** in the first sentence of Materials and Methods section.

### **Requirements for Different Types of Articles**

- **Original articles:** Should contain a structured abstract (Background, Objective, Material and methods, Results, Conclusion), 3-5 keywords (at least three keywords must be in MeSH, you can check them in this address of website <https://www.ncbi.nlm.nih.gov/mesh>). The length should not exceed **250** words excluding the title and names section. References should not be stated.
- **Clinical trials:** The format is similar to original articles. RCTs should be registered at any RCT Registry approved by the WHO and their registration number should be mentioned.
- **Meta-analysis or Systematic reviews:** Systematic reviews of RCTs or Observational Studies are permitted for submission. The protocol of the study should adhere to PRISMA or MOOSE guidelines for systematic reviews of RCTs or Observational studies, respectively. Abstracts should be structured.
